A recent purchase from a prominent maker is the cause of this unusual offering. Every garment was made for this season, but a week ago his stock was too large, and anxious to sell. Our bid was at a price which brought to our floor the greatest and largest Shirt Waist purchase of the season.

Ten hundred Shirt Waists was the quantity of this unexpected and welcome purchase. Waists of white lawn in plain or fancy weave, trimmed in many ways with lace, embroidery or tucks, have military collars, button back or front, sleeves are elbow length. Obtaining Money Under False Pretenses.

Francis Medbury, the village blacksmith at North Windham, was in court Wednesday morning, charged with obtaining \$15 under false pretenses. He pleaded not guilty and Attorney Samuel B. Harvey requested a continuance so that he could prepare the case. Attorney Hunter, who is assistant prosecuting attorney, objected, but after some discussion continuance was allowed by Judge Shea.

Mr. Medbury contends that he has done nothing wrong and obtained the money honestly to assist a fellow citizen who has recently had a death in the family. There are witnesses to back up Mr. Medbury's contentions and a strong fight will be put up.

Miss Verna M. Hastings has as her

guest Miss George Usher of Chicopee, who is under the Quinebaug bridge and allowing the sewage to flow into the river when Danielson first commenced to build its sewer system about six years ago.

These letters of Mr. Atwood make it clear that in giving their consent to the emptying of sewage into their pond under the bridge the Quinebaug company did so with the understanding that it was to be a temporary arrangement and that at any time the sewage should become a nuisance or a menace to public health that they should retain the right to request its removal. One of the letters, written this spring, contains the statement that the odor from the sewer discharge was so disagreeable as to be notifiable by residents in the vicinity of the bridge, and also contains the request for the removal of the sewer. This letter was followed with deep interest by the voters and was the inspiration for a lengthy discussion as to whether or not there is an odor from the sewer discharge sufficient to warrant the borough going to the expense of making the change of terminal desired. In answer to a question as to whether he had made any investigation as to the alleged odor from the sewer under the bridge, Warren Ballard said he had visited the bridge fifteen times and that two other members of the board had made several visits each to the place and neither he or the other two members had been able to detect any odor. The visits have been made during the summer, when the river is at its lowest level of the year, and therefore more liable to give off odors than at any other time. Dr. W. E. Hyde also told of making a similar investigation at various times and with the wind in various quarters, but he, too, had been unable to detect any odor from the sewer. The fact was pretty well established that the odor is not a real menace as yet, if it exists at all; yet, after carefully considering the question of its removal, a majority of the voters in the meeting voted to remove the terminal to a point below the mills of the Quinebaug company.

DANIELSON

Misses Margaret, Katherine and Helen of this city returned from a stay at Crescent Beach.

FARRELL'S TEST

Of Jewett City-Wauregan Game Will Be Heard by League Directors Sunday.

President Abel L. Reeves has called a meeting of the directors of the Eastern Connecticut baseball league to be held in Danielson on next Sunday afternoon. The meeting will be the last before the close of the season. The principal matter to come before the meeting is the hearing of Manager Farrell's protest of the game recently won by Jewett City from Wauregan in the latter place.

There are also several other matters of minor importance that will come up for the consideration of the managers.

Temperance Campaign Opened.

Mrs. L. C. Fuller of Scotland, county president of the W. C. T. U., addressed a meeting in the interest of temperance in the Baptist church Wednesday evening. The meeting marked the opening of the fall campaign in this town.

Excavating for New Water Pipe.

Pipe was laid for the line of water pipe to connect with the new hydrant recently voted by the borough and which is to be installed on Furnace street, having the aid and employes of the Crystal Water company have commenced the excavating work. The hydrant will be located near Kennedy's under the new water pipe in a very advantageous place for the use of the fire department if they are ever called upon to fight a fire in that locality. The pipe is being laid here to avoid without adequate protection.

To Arrange Meeting at Canterbury.

Miss Elizabeth B. Bigelow of Colchester, Miss Carolyn Browne of Stamford and Miss Marion H. Bridgman of Hartford have been named as a committee of the Captains Deliverance Browne association to make arrangements for a pilgrimage to Canterbury next summer and hold a meeting in the old church in which Deliverance Browne once held the office of deacon. The association recently held its annual meeting in Brooklyn.

Changing School Management System.

Will Return This Week.

Rev. and Mrs. D. J. Nelly, who have been spending the last week at Nova Scotia, are expected to return to Danielson this week. Rev. Mr. Nelly will occupy his post in the Baptist church on Sunday morning.

THE SEWER MATTER.

Voters Preferred to Move Terminal Now and Avoid Litigation—Trouble Not Yet Ended, However.

The great number of voters who failed to attend the meeting called to pass on the matter of sewer extensions on Tuesday evening missed an opportunity to learn a great many things that they ought to know about Danielson's sewer system, for there was a fund of information on tap.

Warden W. L. Ballard had a small library of statistics and correspondence bearing on the sewer matter and the most of it was very interesting and instructive. This correspondence included some letters from J. Arthur Atwood of the Quinebaug company and others from Civil Engineer C. E. Chandler

relative to placing the terminal of the sewer under the Quinebaug bridge and allowing the sewage to flow into the river when Danielson first commenced to build its sewer system about six years ago.

These letters of Mr. Atwood make it clear that in giving their consent to the emptying of sewage into their pond under the bridge the Quinebaug company did so with the understanding that it was to be a temporary arrangement and that at any time the sewage should become a nuisance or a menace to public health that they should retain the right to request its removal. One of the letters, written this spring, contains the statement that the odor from the sewer discharge was so disagreeable as to be notifiable by residents in the vicinity of the bridge, and also contains the request for the removal of the sewer. This letter was followed with deep interest by the voters and was the inspiration for a lengthy discussion as to whether or not there is an odor from the sewer discharge sufficient to warrant the borough going to the expense of making the change of terminal desired. In answer to a question as to whether he had made any investigation as to the alleged odor from the sewer under the bridge, Warren Ballard said he had visited the bridge fifteen times and that two other members of the board had made several visits each to the place and neither he or the other two members had been able to detect any odor. The visits have been made during the summer, when the river is at its lowest level of the year, and therefore more liable to give off odors than at any other time. Dr. W. E. Hyde also told of making a similar investigation at various times and with the wind in various quarters, but he, too, had been unable to detect any odor from the sewer. The fact was pretty well established that the odor is not a real menace as yet, if it exists at all; yet, after carefully considering the question of its removal, a majority of the voters in the meeting voted to remove the terminal to a point below the mills of the Quinebaug company.

Low Water Gives Holiday.

Don't Think Much of It.

As a demonstration of Major General Leonard Wood's theory of the weakness of our coast defense, the war came in Massachusetts is not convincing. The case was the simulation of such an invasion by a summer excursion down the Sound. —Philadelphia Record
